

OXYGEN MAX

TABLET

COMPOSITION : 100% DISPERSIBLE SODIUM PER CARBONATE WITH IMPORTED OXYGEN RELEASERS, Low dissolved oxygen [D.O] levels are the major water quality limiting variables in aqua culture. Critically low D.O. levels in ponds can cause stress or even mortality of prawn & shrimp in ponds. However chronically low D.O level can reduce growth, feeding and molting frequency in prawn & shrimp.

BENEFITS :

- ➔ **OXYGEN MAX** increases D.O levels within a short period of time and maintaining it for along duration 01 up to 4-5 days
- ➔ **OXYGEN MAX** releases oxygen vigorously into the ponds - Controls D.O Problems immediately
- ➔ **OXYGEN MAX** is powerful and 100% dispersible sodium per carbonate.

DOSAGE : 1 Kg/ Bigha

FEED MIXING : 10 gm/1 Kg of Feed
(OR) as advised by an aquaculture consultant.
