

TOXI GURD

GRANULE & POWDER

Harmful Gas Extinguisher

Extinguishes harmful gas and increases Oxygen level in the pond. Everyday's organic substances such as Phyto Plankton and Zoo Plankton, unused food particle, excreta of all watery organisms, and also other refuses are regularly deposited in pond resulting pollution of pond bottom. Thus harmful gas develops in the pond such as Ammonia, Sulphur-dioxide and Hydrogen-sulphide which hamper growth of fish and prawn, invite disease and so even death.

- BENEFITS**
- Modern Technology - The best extinguisher of harmful gases formation in the pond. When
 - ➔ **TOXI-GUARD** is used in pond water, fish floating over surface of water is eliminated. If the water is muddy then by using
 - ➔ **TOXI GUARD** in water oxygen level in pond water increases and reduces muddy tendency.
 - ➔ If **TOXI GUARD** used in pond before maulting of prawn no problem would occur for maulting. It also sustains standard quality of water and maintain pH level maintains.
 - ➔ **TOXI GUARD** maintains good health of the pond soil.
- APPLIC- ABILITY**
- **To prepare pond** : 40 - 50 Kgs / Acre powder, 20 – 25 kg/Acre granules.
 - **For cultured pond** : 20 - 25 Kgs / Acre powder, 10-15kg/acre granules.
 - **(OR)** As per direction of Fish Specialist
- PACK**
- 5 Kg POWDER, 5Kg granules.
